

EAs PERFORMANCE – MUST READ

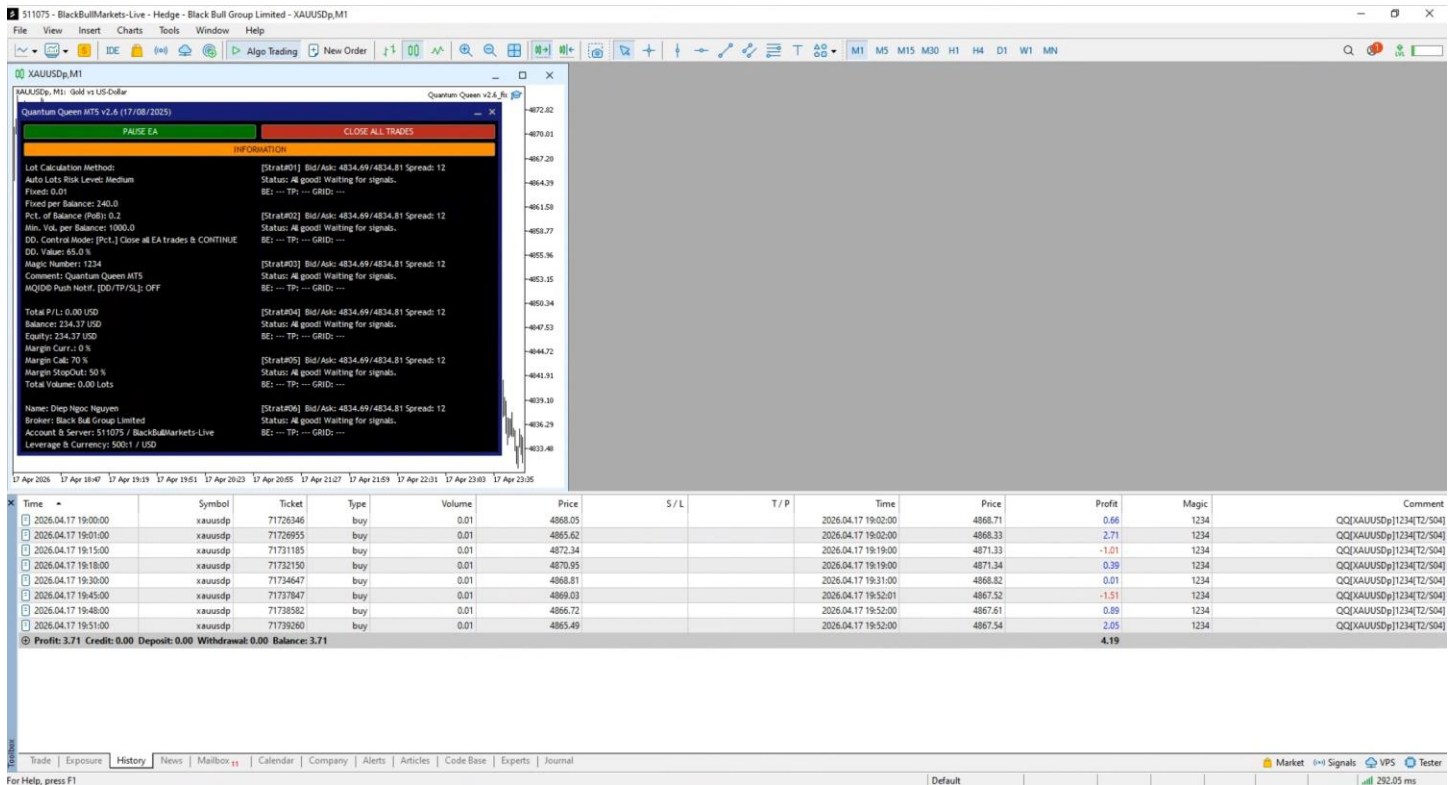

If I tell you that you can **lose 60% of your trading profit** if you ignore this, would you believe me?

Trading results depend largely on broker (especially for EAs that need speed and tight spread - like Quantum Queen). See below -**Today trading results 17/4/2026** for Quantum Queen from my **live accounts** across different brokers:

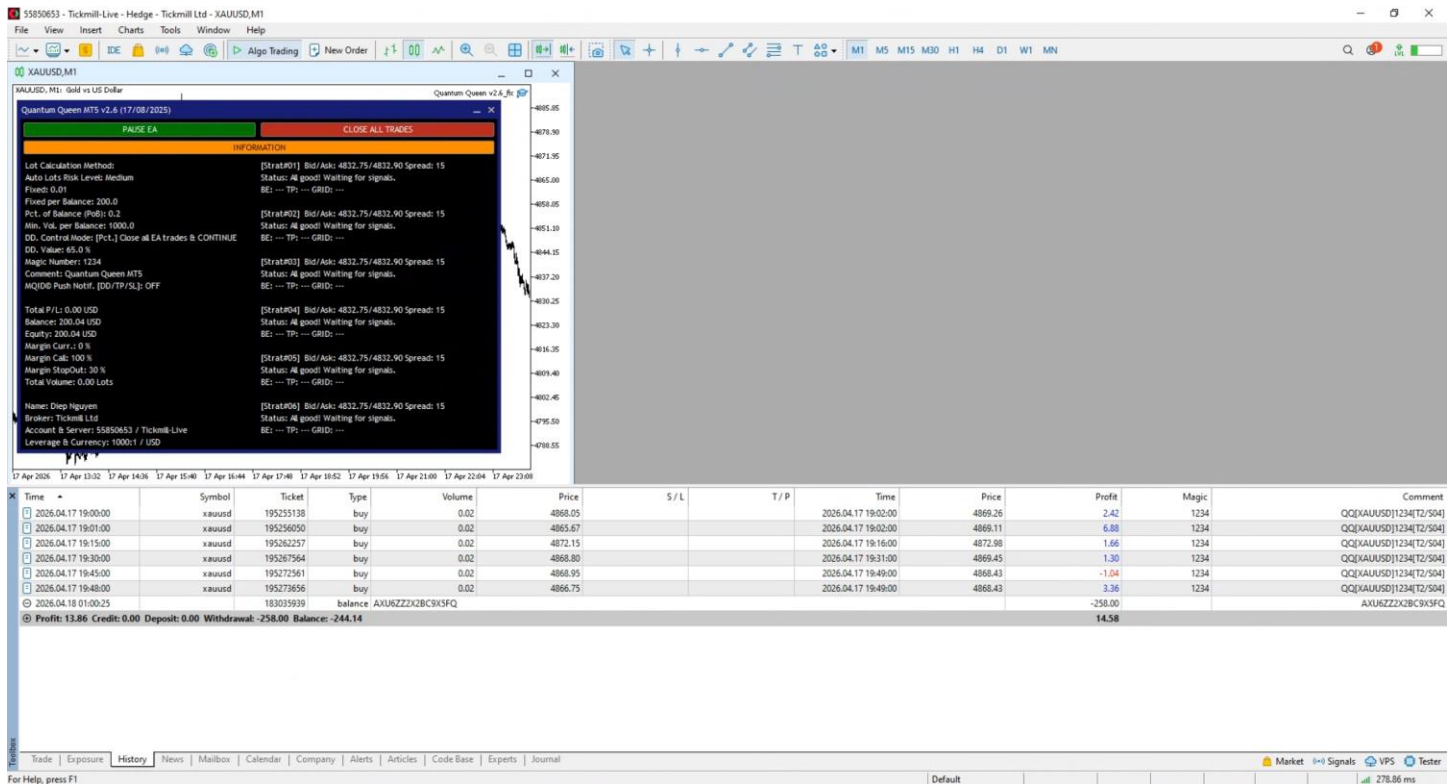

ExPro Live Account profit \$9.66 (net \$9.10 for 0.01 lots)

Blackbull Markets Live account profit \$4.19 (net \$3.71 for 0.01 lots)

Tickmill Live account (this is a bigger account placed 0.02 lots, equal to profit \$7.29 net \$6.93 for 0.01 lots)

Brokers	Profit	Profit Net (After fee)	Percent	LOST of profit
FxPro	\$ 9.66	\$ 9.10	100%	0%
Tickmill	\$ 7.29	\$ 6.93	76%	24%
Blackbull Markets	\$ 4.19	\$ 3.71	41%	59%

So, with this quick calculation you can see that **you lost 59% of your trading profit today** if you trade with [Blackbull Markets](#) instead of [FxPro](#). This will happen every time you have a trade for the rest of your trading life.

You might need time to experience this, but from my experience I can tell you [FxPRO](#) and [Tickmill](#) yielded the best results. [IC MARKETS](#) is even worse than [Blackbull Markets](#) and I have stopped using it for live trading.

BONUS

Do you want to choose up to **8 BOTs from our shop for FREE?**

If you REGISTER 1 new trading profile/account, using our partner LINKS below (select 1 broker that is new to you) and I will send you 2 bots of your choice for FREE.

if you create all 4 trading profiles, I will send you 8 bots (^.^)

Don't know which bot to choose yet? Have you ever used Quantum queen, Quantum King or Quantum Emperor yet? if you have not, I recommend owning them - Bogdan Ion Puscasu is the best developer based on my experience. Good return on investment, his EAs are top-notch.

Let me know if you are interested, any question reach out to TradingEAs2@gmail.com cheers.
